

FOR YOUTH DEVELOPMENT®
FOR HEALTHY LIVING
FOR SOCIAL RESPONSIBILITY

Hello Swim Team & Aquatic Users:

As many of you know, the air handling unit for our YMCA pool is nearing the end of its service life. It is currently operating below peak efficiency and is scheduled for replacement. After thorough research and consultation with multiple vendors and local pool operators, we have selected the DesertAire ExpertAire System—a state-of-the-art unit with advanced dehumidification capabilities. This new system will allow us to maintain ideal temperature and humidity levels in the pool area year-round, ensuring a comfortable and healthy environment for all.

Our pool serves hundreds of individuals and families every week. High-quality aquatic programming begins with a high-quality facility—and this upgrade is a vital step forward. We are asking for your support to help make this project a reality. The total cost is \$569,000, and while the rooftop unit has already been ordered, we anticipate delivery and installation between late March or late April 2026.

Please visit the link below and see the reverse side of this letter to learn more about this important project and how you can help support the Geneva Lakes Family YMCA by contributing toward the cost of this new Rooftop Unit. Your generosity will help us continue providing an exceptional aquatic experience for our community. We'd also be grateful if you shared this link with others—friends, companies, or organizations—who may wish to join in supporting this effort.
